Transpersonal Hypnotherapy/NLP Certification Training Programs

Accessing Deeper Dimensions of Self Transcending Personal & Professional Frontiers

2017 Catalog

Thank you for downloading our catalog. Depending on your level of study thus far, you may find curriculum headings and subjects that you think you have already covered or know about. Since my courses are a unique and radical synthesis of NLP, hypnotherapy, and Eastern spiritual wisdom techniques, such prior knowledge or certification with another school does <u>not</u> diminish the benefit you would receive from taking my courses.

My courses have proven to be advanced even for those with prior training, due to the unique insights and techniques I present, based on over 40 years of intensive spiritual studies. Many NLP and hypnotherapy "old pros" have taken my courses and have reported that their clinical practice and their lives were transformed as a result. No one who has taken the course has found it to be redundant.

The reason is best summed up in these enthusiastic testimonials from well-educated spiritual seekers who have taken the course:

"You have an unbelievable ability to bring the "unknown/hidden" into the light of day in such a way that it is very meaningful and revolutionary in terms of how we experience this moment. This is makes you so unique. This is a fast track compared to my years of reading, meditating and studying with other teachers. You are unique messenger, an alchemist almost, for all the source materials you use. It is hard to articulate just what I mean--I had heard it all before, read all the books, did all the exercises, but it wasn't until this course that I really experienced a true peace." -- C. S., M.A., Independent Study Graduate

"I'm learning more about my trances and more about staying present than I ever imagined I would from a course about hypnosis. This stuff blows my mind. You were right when you said that it has a transformative power. Thank you so much for sharing your peace and wisdom."

-- J.S., Independent Study Student

"No other author that I have read or studied in this field brings such passion and consciousness to the 'how to' of hypnotherapy as Jack Elias. When I first started with this book of technique I was pushed back a little by his "process" and then, shortly, I could feel the compression of wisdom and mind wrenching and concept blowing sentences that brought whole realms of my own belief systems to the fore to be examined in an instant. Often, I would have to read and reread whole paragraphs and then put the book down and breathe deeply as mini realizations of the Truth of Elias's monologue seeped in. I found my self celebrating "eurekas" often. One of the best things about the Elias's tapes is getting to know him and feel the great sense of humor and then getting inspired to go back to read the book again." — G.M., Gestalt Therapist, Certified Hypnotherapist

Testimonials like these are obviously very gratifying, but they are also humbling, and intensify my gratitude to my wise, loving, and Awake teachers. What I am able to pass on from them makes these offerings worth taking without consideration for accreditation or CEU credits, although in many instances college credits and CEU's are available.

There are two easy ways to sample the experience of participating in the *Finding True Magic* courses: the <u>Introductory audio</u>, and our <u>Test the Waters</u> options. Thank you again for your interest.

Finding True Magic Trainings Offer Life-changing Skills

Thank you for your interest in studying Transpersonal Hypnotherapy/NLP at the Institute for Therapeutic Learning! We hope this catalog describing our combined Hypnotherapy and NLP certification programs is helpful and thought provoking.

Our courses emphasize underlying insights and principles governing **the nature of mind and communication** upon which hypnotherapy, NLP, shamanism, and all other transformational techniques depend. Grasping these potent understandings allows you to master the variety of techniques in the course, from the most basic to the most advanced, easily and delightfully.

With this knowledge, our students effectively dispel confusion both personally and professionally, and achieve new levels of wisdom, compassion, and healing for themselves and others.

The course is stimulating and challenging, yet is also a safe place to learn and grow. The approach is holistic, heart centered, *and* clinically comprehensive—practical and down-to-earth. The course has an excellent 14-year track record with professionals and laypeople alike, as indicated by the testimonials included in this packet.

This course has been approved for undergraduate, masters and doctoral level credit by several universities, on a case-by-case basis. CEUs are available.

This is a course based in spiritual/religious science (non-sectarian). Upon certification you may complete ordination in a church of your choice and practice these modalities as a minister. Practicing as a minister is exempt from state rules governing counseling and therapy. You may also choose to complete state requirements for therapists and/or counselors and practice in accordance with these regulations.

Learn how to:

- Do Self-Hypnosis and Inner Healing for self-transformation and to awaken higher consciousness
- Become a highly successful hypnotherapist, guiding profound and lasting changes in others, as well as in yourself
- Enhance healing arts skills you already have, with expertise in hypnotherapy and neurolinguistic programming (NLP)—highly versatile processes that can be applied to virtually any healing or self- improvement goal
- Work with the full range of the psyche to bring about lasting positive change—encompassing the subconscious, conscious, and super-conscious dimensions of self

Personal Healing and Transformation

Learn how to enter varying levels of trance through the use of hypnotic technique. *Training includes substantial practice of the techniques, both in guiding another and being guided*. As you practice self-hypnosis, you become ever more adept at entering and utilizing trance states for inner change work. This enables you to quickly access deeper dimensions of self—to clear subconscious blocks, experience self-transformation, and to draw upon super-conscious levels of wisdom and compassion.

Please visit <u>FindingTrueMagic.com</u>. You'll also want to read <u>testimonials about the book</u>, *Finding True Magic: Transpersonal Hypnosis and Hypnotherapy/NLP*.

"To be fully engaged in the process of learning is to be fully alive, moment by moment. To be awake from all forms of fearful hypnotic states in daily life is the only way to experience being fully alive, fully and joyfully engaged in the expression of one's personal genius. For each of us to experience ourselves in this way is the ultimate goal of this course.

Hypnotic processes are redundant. You don't have to put people in trance; they are already in trance. Their problems are the fruit borne of their trances. You can use standard hypnotic processes, which you will learn in this course, as poisons are used in proper fashions to make medicines. But I want you to perform such alchemy from a greater viewpoint of recognizing that the goal is not to become established in comfortable trances that work for your fearful self, but to become free of trances: present, at ease, free of fear—whole, peaceful, and awake, radiating joy and enthusiasm."

Introduction

Neurological researchers have found that generally we utilize only about 10% of our brain capacity. The other 90% comprises that which is beyond the threshold of conscious awareness, namely, the unconscious. By achieving an appropriate level of hypnotic depth or "altered state," the unconscious is made conscious, and one achieves a heightened state of awareness and well-being. He or she identifies and releases hidden subconscious blocks and actualizes higher potentials. Remarkable things are possible in such "altered states." Past origins of current blocks can be traced to infancy, birth, the womb and beyond—all with equal facility. Lifelong emotional patterns can be released in a relatively short time. It is possible to enhance your intuitive inner guidance and vividly commune with your Higher Self.

What Is Transpersonal Hypnotherapy/NLP?

It is the use of hypnosis to access the "transpersonal" dimensions of self—those which are "trans" ("across" or "beyond") the purely conscious awareness—to encompass the subconscious and superconscious dimensions. Thus, subconscious blocks can be identified and released; superconscious potentials can be accessed and actualized. Our approach is a synthesis of various therapeutic and hypnotherapeutic sources, among them, Transpersonal Psychology, Gestalt Psychology, Reevaluation Counseling, Ericksonian Hypnotherapy, Neuro-Linguistic Programming (NLP), "Ultra-Depth" Hypnosis, Hypnoanalysis, Active Imagination with Inner Archetypes, Higher Consciousness processes, and meditative techniques and insights.

Professional Training

Our trainings (both Distance Learning and Onsite) are designed to enable a high degree of proficiency in state-of-the-art hypnotherapy, *regardless of prior background and experience*. You can utilize the trainings for personal self-healing and higher consciousness, to enter the field of hypnotherapy as a certified professional, or to complement your existing skills in the healing arts. Learn to apply the processes of hypnotherapy and NLP to catalyze healing changes in others. Beginning, Intermediate, and Advanced levels of certification are offered for professional training:

Transpersonal Hypnotherapist

Master Transpersonal Hypnotherapist Master

Level II Transpersonal Hypnotherapist Master

Level III Transpersonal Hypnotherapist

If you elect to practice as a minister, "ministerial" can be added to your title. If you choose to qualify according to state regulations to practice as a counselor/hypnotherapist, or as some other kind of therapist, "clinical" can be added to your title. These are your options to choose.

What Our Graduates Are Saying

"This was a powerful course. One of the greatest strengths lay in the fact that it taught hypnosis not simply as a technique to deal with isolated behaviors, but as an approach that deals with a client's whole way of approaching life. We covered a great deal of material, we explored many things in depth, and we were given a strong foundation for using hypnotherapy both personally and professionally."

Ann T., M.A. in Counseling Seattle, WA

"Jack Elias is a born teacher... as much at home with Socratic dialogue and analysis as with a Zen paradoxical and intuitive approach. An intriguing and novel synthesis of Eastern and Western perspectives and techniques, this is a very practical approach to clinical hypnotherapy by an expert in the field. Jack is contributing to the further establishment of hypnotherapy as a total approach to healing rather than simply as a technique which may be applied in the context of psychotherapy."

Ivor Morrish, Educator and Author, Disciplines of Education, The Dark Twin: A Study of Evil and Good

"...Since 1979...I have worked in residential treatment centers, mental health centers, and private practice with individuals, couples, groups, and families. (Nothing) has been as effective in promoting change in people's lives as the techniques I learned in (Jack's) course. This course is valuable to all therapists (including) MD's and other medical professionals."

Patricia Ann Williams, M.D., Psychiatrist & Psychotherapist

"One of my favorite new books...I am impressed with the way Jack offers an intelligent and easy-to-understand explanation of complicated concepts...fascinating and moving...apart from many I've encountered over the years. This extraordinary book... is a stand alone text from which even the most experienced therapist will learn a lot about therapy... and about him/herself."

When a therapist gains competency with these ideas and the techniques that accompany them, it is possible and common to help people in just one session, or a few sessions, to become free from, or make dramatic advances against, life long afflictions such as:

Panic Attacks TMJ Compulsions Phobias Chronic Pain
Anxiety Post-Traumatic Stress Insomnia Allergies Asthma
Addictive Patterns Depression Inhibition Prolonged Grief

(Hypnotherapy is not a substitute for appropriate medical care or necessary consultation with medical professionals.)

[&]quot;This course helped me connect more deeply with my inner wisdom and compassion. It gave me easy to use techniques to assist patients and their families draw on their own powerful inner resources to deal with illness and loss. It's been 10 years since I took the course for the first time. What I learned continues to enrich all aspects of my life."

A high school diploma or GED is a prerequisite for enrolling in this training. A person should be in general good health to participate in this training, although some limitations, reviewed on a case by case basis, are allowable.

No placement is offered at the completion of the training. **However, guidelines for establishing** and maintaining a successful practice are part of the course curriculum.

Students are expected to conduct themselves in a mature, respectful manner conducive to learning the skills and knowledge of this course. Grounds for immediate dismissal include: the use of alcohol or drugs, any behavior disruptive or threatening to class participants, including an exhibited lack of proper attitude toward learning the course curriculum, excessive tardiness and missed class time without warranted excuse. Students so dismissed will have an opportunity to request readmission except in cases of substance abuse. Nothing in the policy prevents the student from contacting the Workforce Board at 360-709-4600 at any time with a concern or complaint.

If a student misses a portion of the course for a valid reason, tutorial make-up will be provided. When appropriate, a student may make up a weekend section during a subsequent training.

Requirements:

- 1) At the completion of each 25-hour section of the training, students will be required to demonstrate their understanding of course material by conducting a 1 hour hypnotherapy session.
- 2) A written exam included with Phase I is due by the beginning of Phase IV. The written exam is pass/fail.
- 3) Therapy sessions are pass/fail as judged and evaluated by the instructor taking into account feedback of the subjects of therapy. Successful completion of each section is a prerequisite for continuing the course. Retaking a failed therapy session will take place within one week of the end of the section with the instructor.

There are seven required books which students must purchase in addition to the course tuition. Books can be purchased online at **www.FindingTrueMagic.com**. Total cost of books, with tax, is approximately \$145.00.

Should I Take the Course in Person or Take the DISTANCE LEARNING/INDEPENDENT STUDY Option?

For some of you the answer to this question will be clear because of financial and/or logistical considerations. It is less demanding financially and logistically to do the Distance Learning Option at home at your own pace. Live participation gives you the enriching and powerful experience of "on the spot" group interaction and direct involvement. In a live training, you have opportunities to be a demonstration subject with the trainer, and you get an average of 30 practice hours in therapy sessions as client and therapist.

It is common for students to experience **major transformations** while taking this course. This is true with both our live training and Distance Learning Option.

"What a great investment I have made and what a wonderful gift you have to offer. As I have listened to the tapes I have laughed, cried, become angry and experienced every possible emotion. I have learned more in these past seven months than in my entire lifetime. Your no-nonsense heartfelt approach is wonderful. I am looking forward to (live training) to learn to apply these simple delicate techniques and skills more intently."

L.D., Transpersonal Hypnotherapist

If financial / logistical considerations aren't decisive factors, consider taking both:

Both courses have their unique strengths and value. As explained on the "Options" page, live training students and graduates are urged to buy the A/V program for study even if they choose not to seek additional certification. The A/V program is an invaluable preparation for live training. With the audio/video program, you experience the techniques of the course repeatedly applied and discussed under many more conditions and with many more people and issues than you can get in one live training. They are a permanent reference library you can use again and again to thoroughly absorb and integrate these learnings. And they powerfully stimulate your own personal growth!

One of two important understandings regarding hypnosis, and learning in general, is that *repetition is crucial* to truly elaborate and integrate a learning as part of our being. While this is an important factor in the live presentation, repetition is most powerfully afforded by the tapes.

The other basic and crucial requirement for hypnotic learning, and learning in general, is *vivid emotional impact*. Live classes, as you might expect, have a special "on the spot" intensity. The tapes, recorded at live trainings, carry that intensity and spark it in a special powerful, *yet safe* way in the privacy of listening to them. Students *consistently* report this.

"No other author (that I have read or studied) in this field brings such passion and consciousness to the 'how to' of hypnotherapy as Jack Elias. When I first started with (the book) I was pushed back a little by his "process" and then shortly realized that he was literally attempting to move me to an altered state while writing of his purposes and concepts. I could feel the compression of wisdom and mind wrenching and concept blowing sentences that brought whole realms of my own belief systems to the fore to be examined in an instant. Often, I would have to read and reread whole paragraphs and then put the book down and breathe deeply as mini-realizations of the Truth of Elias's monologue seeped in. I found myself celebrating "eurekas" often. One of the best things about the tapes is getting to know you and feel the great sense of humor and then getting inspired to go back and read the book again!"

G.M., Gestalt Therapist,

Hypnotherapist

The course is comprehensive. By the end of their study, "live" and independent study students have a *facility* with therapeutic processes, and with the business requirements of setting up a practice. They have the confidence to begin. But so much information is provided in the course, that *mastery* of all the material is impossible to achieve by the end of the course. *It is not expected*. What is hoped for is that you will maintain an inquisitive, inspired "beginner's mind" to constantly go back to the material, contemplating it and integrating it more and more thoroughly.

Repetition is the Mother of Skill and Mastery!

An interviewer once asked Milton Erickson, the foremost and most innovative hypnotherapist of this century, how he would sum up or define hypnosis after his 50+ years of study, contemplation and client work. Milton replied, "It's too early to tell." This is beginner's mind.

It is highly recommended that students do a live training and complete the Distance Learning Course protocols to qualify for 300 hour and higher Certification. [Distance Learning protocols for live training graduates are more demanding than those described above for first time students.

In general, non-certification options would be suitable in two cases:

- 1) Students satisfied with their existing credentials and with such confidence in their facility with therapeutic processes, that they think the dialogue with and feedback from the instructor unnecessary for their successful assimilation and utilization of the material, and
- 2) Students taking the course to develop the skills of self-inquiry and contemplation for personal growth who know they are motivated to thoroughly review the material without outside support.

If one chooses this option, there is no certification or acknowledgment of completion of the course given. This option can be converted to a certification program by submitting the required documents and taking the tutorials for each phase at an additional investment of \$200.00/Phase.
