

Thank you for ordering this PDF version of our catalog.

Depending on your level of study thus far, you may find curriculum headings and subjects that you think you have already covered or know about. Since my courses are a unique and radical synthesis of NLP, hypnotherapy, and Eastern spiritual wisdom techniques, such prior knowledge or certification with another school does not diminish the benefit you would receive from taking my courses.

My courses have proven to be advanced even for those with prior training because of the unique insights and techniques I present based on over 40 years of intensive spiritual studies. Many NLP and hypnotherapy "old pros" have taken my courses and have had their practice and their lives transformed. Noone who has taken a course has found it to be redundant.

I hope the catalog presentation, and testimonials included, will cause you to consider, at the very least, one of the '**Test the Water**' options. The reason is best summed up in these excerpts from testimonials from highly educated spiritual seekers:

"You have an unbelievable ability to bring the "unknown/hidden", the part that runs all of us, into the light of day in such a way that it is very meaningful and, almost, revolutionary in terms of how we experience our moment-to-moment existence. This is what makes my experience with you so unique. This is like being on a fast track compared to my years of reading, meditating and studying with other teachers. You become some kind of unique messenger, an alchemist almost, for all the source materials you use. It is hard to articulate just what I mean - I had heard it all before, read all the books, did all the exercises, but it wasn't until this course that I really experienced a true peace."

**C. S., M.A., Independent Study Graduate**

"I'm learning more about my trances and more about staying present than I ever imagined I would from a course about hypnosis. This stuff blows my mind. You were right when you said that it has a transformative power. This is what I was looking for. Thank you so much for sharing with me your peace and wisdom." **J.S., Independent Study Student**

"No other author (that I have read or studied) in this field brings such passion and consciousness to the 'how to' of hypnotherapy as Jack Elias. When I first started with this book of technique I was pushed back a little by his "process" and then shortly realized that he was literally attempting to move me to an altered state while writing of his purposes and concepts. I could feel the compression of wisdom and mind wrenching and concept blowing sentences that brought whole realms of my own belief systems to the fore to be examined in an instant. Often, I would have to read and reread whole paragraphs and then put the book down and breathe deeply as mini realizations of the Truth of Elias's monologue seeped in. I found my self celebrating "eureka's" often. One of the best things about the Elias's tapes is getting to know him and feel the great sense of humor and then getting inspired to go back to read the book again." **G.M., Gestalt Therapist, Certified Hypnotherapist**

Testimonials like these are obviously very gratifying. They are also very humbling and intensify my gratitude to my wise, loving, and Awake teachers. What I am able to pass on from them makes these offerings worth taking without consideration for accreditation or CEU credits, although in many instances college credits and CEU's are available.

Please visit my website, [www.FindingTrueMagic.com](http://www.FindingTrueMagic.com). Note the information about my book, ***Finding True Magic: Transpersonal Hypnosis and Hypnotherapy/NLP***. I offer easy ways to experience me teaching – note the Introductory CD, and the Test the Waters options on the Products page and also in this catalog.

Please let me know how you learned of my work. Thanks for your interest.

**Transpersonal Hypnotherapy/NLP  
Certification Training Programs**

*Accessing Deeper Dimensions of Self  
Transcending Personal & Professional Frontiers*

“To be fully engaged in the process of learning is to be fully alive, moment by moment. To be awake from all forms of fearful hypnotic states in daily life is the only way to experience being fully alive, fully and joyfully engaged in the expression of one’s personal genius. For each of us to experience ourselves in this way is the ultimate goal of this course.

Hypnotic processes are redundant. You don’t have to put people in trance; they are already in trance. Their problems are the fruit borne of their trances. You can use standard hypnotic processes, which you will learn in this course, as poisons are used in proper fashions to make medicines. But I want you to perform such alchemy from a greater viewpoint of recognizing that the goal is not to become established in comfortable trances that work for your fearful self, but to become free of trances: present, at ease, free of fear—whole, peaceful, and awake, radiating joy and enthusiasm.”

—Jack Elias, Finding True Magic

## Introduction

Neurological researchers have found that generally we utilize only about 10% of our brain capacity. The other 90% comprises that which is beyond the threshold of conscious awareness, namely, the unconscious. By achieving an appropriate level of hypnotic depth or “altered state,” the unconscious is made conscious, and one achieves a heightened state of awareness and well-being. He or she identifies and releases hidden subconscious blocks and actualizes higher potentials. Remarkable things are possible in such “altered states.” Past origins of current blocks can be traced to infancy, birth, the womb and beyond—all with equal facility. Lifelong emotional patterns can be released in a relatively short time. It is possible to enhance your intuitive inner guidance and vividly commune with your Higher Self.

### What Is Transpersonal Hypnotherapy/NLP?

It is the use of hypnosis to access the “transpersonal” dimensions of self—those which are “trans” (“across” or “beyond”) the purely conscious awareness—to encompass the subconscious and superconscious dimensions. Thus, subconscious blocks can be identified and released; superconscious potentials can be accessed and actualized. Our approach is a synthesis of various therapeutic and hypnotherapeutic sources, among them, Transpersonal Psychology, Gestalt Psychology, Reevaluation Counseling, Ericksonian Hypnotherapy, Neuro-Linguistic Programming (NLP), “Ultra-Depth” Hypnosis, Hypnoanalysis, Active Imagination with Inner Archetypes, Higher Consciousness processes, and meditative techniques and insights.

### Professional Training

Our trainings (both Distance Learning and Onsite) are designed to enable a high degree of proficiency in state-of-the-art hypnotherapy, *regardless of prior background and experience*. You can utilize the trainings for personal self-healing and higher consciousness, to enter the field of hypnotherapy as a certified professional, or to complement your existing skills in the healing arts. Learn to apply the processes of hypnotherapy and NLP to catalyze healing changes in others. Beginning, Intermediate, and Advanced levels of certification are offered for professional training:

#### Transpersonal Hypnotherapist

#### Master Transpersonal Hypnotherapist Master

#### Level II Transpersonal Hypnotherapist Master

#### Level III Transpersonal Hypnotherapist

If you elect to practice as a minister, “ministerial” can be added to your title. If you choose to qualify according to state regulations to practice as a counselor/hypnotherapist, or as some other kind of therapist, “clinical” can be added to your title. These are your options to choose.

## What Our Graduates Are Saying

We covered a great deal of material, we explored many things in depth, and we were given a strong foundation for using hypnotherapy both personally and professionally."

An intriguing and novel synthesis of Eastern and Western perspectives and techniques, this is a very practical approach to clinical hypnotherapy by an expert in the field.

**Adrian B., Drug Addictions Counselor**

"The material and spiritual approach are very appropriate for the work I do with Native peoples...but, more importantly, the course has changed the way I interact within all relationships. This enlightened therapy has created so many inroads in working with client issues, behavior patterns, even family relationships! I have tools to heal spiritually, instead of focusing on problematic actions. This is the most CREATIVE thing I've ever learned or done. It blows traditional psychotherapy out of the water. I appreciated the camaraderie from Day 1."

**Jeanne P., M.A., Mental Health Counselor**

"Jack's approach steps out beyond formula and limitation. Knocks down boundaries and provides the ground for moments of true insight, self-discovery, and awakesness. The first night, it became obvious that we were going to experience Hypnotherapy at its core. I've never been through something like this with a group of people...real change occurred in everyone from the processes, group dynamic, and Jack's delightfully open and humorous approach."

**Peter R., Black Belt Martial Artist, Musician**

"The class atmosphere is ideal for learning: relaxed, informal, yet rigorous. The course material was presented lucidly and unfolded naturally. The text will continue to be a resource for me for a long time. Jack, you are a teacher in the truest sense of the word. The passion, integrity, and depth you bring to these teachings has moved me deeply."

### **Comments from Colleagues and Clients**

Jack Elias is an outstanding teacher and practitioner of "leading edge" therapies. He draws upon a wide range of therapeutic modalities including Ericksonian and Transpersonal Hypnotherapy and Neuro-Linguistic Programming. I have seen him to be a warm, compassionate and resourceful therapist, and I recommend him most highly.

**James Maynard, Founder, Transpersonal Hypnotherapy Institute**

Jack Elias is an outstanding therapist. His work is not only efficient but full of heart. With outstanding clarity, he has helped me correct fundamental flaws in my thinking, resulting in an increase in overall energy and awareness. His effect on many patients I know has empowered them to change limiting beliefs that had handicapped their growth and expression.

**Daniel Lewis, D.C., Chiropractor**

PMS takes up 1/3 of my life. It grew from cramps to threatened divorce if I didn't do something. I've done everything! Doing hypnotherapy with Jack has not taken away PMS, but it has taken away the rage, and I am now able to cope and function.

**L. J., Registered Nurse**

I got immediate results with my eating disorder from my first session. In later sessions, Jack reached issues from my childhood that no other therapy was able to touch. He is clearly gifted, and the doors he opened for me will change my life forever, leading me on to a new self.

When a therapist gains competency with these ideas and the techniques that accompany them, it is possible and common to help people in just one session, or a few sessions, to become free from, or make dramatic advances against, life long afflictions such as:

**Panic Attacks      TMJ      Compulsions      Phobias      Chronic Pain**  
**Anxiety      Post-Traumatic Stress      Insomnia      Allergies      Asthma**  
**Addictive Patterns      Depression      Inhibition      Prolonged Grief**

I have known Jack for 30 years as a fellow meditator. I recently have had the opportunity to work with him on two very important personal issues, and I can truly say his insight and skillfulness as a hypnotherapist is quite remarkable – in fact, astoundingly direct. He transmits the wisdom of the meditative tradition in an easily comprehensive way. I am looking forward to learning his methods for use with my own patients.

**James Sacamano, M.D., Consultation & NeuroPsychiatry**

This course helped me connect more deeply with my inner wisdom and compassion. It gave me easy to use techniques to assist patients and their families draw on their own powerful inner resources to deal with illness and loss. It's been 10 years since I took the course for the first time. What I learned continues to enrich all aspects of my life.

**A high school diploma or GED is a prerequisite** for enrolling in this training. A person should be in general good health to participate in this training, although some limitations, reviewed on a case by case basis, are allowable.

No placement is offered at the completion of the training. **However, guidelines for establishing and maintaining a successful practice are part of the course curriculum.**

Students are expected to conduct themselves in a mature, respectful manner conducive to learning the skills and knowledge of this course. Grounds for immediate dismissal include: the use of alcohol or drugs, any behavior disruptive or threatening to class participants, including an exhibited lack of proper attitude toward learning the course curriculum, excessive tardiness and missed class time without warranted excuse. Students so dismissed will have an opportunity to request readmission except in cases of substance abuse.

If a student misses a portion of the course for a valid reason, tutorial make-up will be provided. When appropriate, a student may make up a weekend section during a subsequent training.

## Requirements:

- 1) At the completion of each 25-hour section of the training, students will be required to demonstrate their understanding of course material by conducting a 1 hour hypnotherapy session.
- 2) A written exam included with Phase I is due by the beginning of Phase IV. The written exam is pass/fail.
- 3) Therapy sessions are pass/fail as judged and evaluated by the instructor taking into account feedback of the subjects of therapy. Successful completion of each section is a prerequisite for continuing the course. Retaking a failed therapy session will take place within one week of the end of the section with the instructor.

There are seven required books which students must purchase in addition to the course tuition. Books can be purchased online at [www.FindingTrueMagic.com](http://www.FindingTrueMagic.com). Total cost of books, with tax, is approximately \$145.00.

Class size ranges from 3-14 students. Classes are held at the Institute address listed. This is a home setting providing a large living room for class time and the privacy of bedrooms and office space for practice therapy sessions. **Classes are kept small providing safe, in-depth, personalized learning.** All materials, except for pen, paper, and required reading described below, will be provided to the students. ***Finding True Magic***, the ITL Hypnotherapy/NLP Training text, containing course script material for therapy work, is included in the tuition investment. The course environment provides appropriate furniture for conducting therapy sessions.

Upon successful completion of the training you will receive certification as a **Transpersonal Hypnotherapist\*, Level I**, or a certificate of successful participation, without title designation.

A certificate of successful participation, without title, in the 150 hour training, *enables a student to obtain registration and to begin their career.* By successful completion of 50 hours of documented supervised client work (1hr.supervisory review/10hrs.of client sessions), or by completion of 50 hours advanced study, such a student will receive a certificate for **200** hours training as a **Transpersonal Hypnotherapist\*, Level I.** **Level I** graduates upgrade to **Level II Transpersonal Hypnotherapist\*** by completing 50 hours of supervised client work or advanced study.

***\*\*This supervisory period, or some variation thereof, is highly recommended for fully certified graduates as well to upgrade their certification from 150 to 200 hours.***

## DISTANCE LEARNING, PRELIMINARY STUDY AND ADVANCED STUDY

### Certification Options

“This course is magic itself. Through Jack Elias' deep and gentle ways, I was able to get in touch with so much about myself that had escaped me in my years of studying and practicing spirituality. Listening to these tapes provokes an almost immediate change inside, a new way of looking at everything. I had heard it all before, read all the books, did all the exercises, but it wasn't until this course that I really experienced a true peace. The course is full of useful ways to experience, and show others how to experience, all the eternal truths that are so slippery and elusive. Thanks, Jack.”

**Chuck S., Distance Learning Student**

**1] Distance Learning:** For those students for whom live participation is not an accessible or desirable option, certification as a Transpersonal Clinical Hypnotherapist is possible through distance learning independent study.

**2] Preliminary Study:** Students considering live training may buy the Distance Learning A/V and textbook prior to on-site training at the Independent Study Non-Certification Tuition Option of **\$1210.00** (See Distance Learning Tuition Options, these inserts, p.6). This option automatically reduces on-site Live Training Tuition from \$2400.00 to **\$1900.00** without the need to meet the early registration discount deadline.

**Total net investment**, independent study materials + live training tuition with discount: **\$3110.00** (1210+1900). The purpose of this generous discount is to encourage investment in the Distance Learning audio/video materials. They are essential to deep comprehension and integration of the rich material of these courses.

Research has demonstrated that one-time participation in any course of significant study results in only about 10% retention. **Protect your investment! Support your desire to achieve competency!** The A/V materials allow you to repeatedly revisit the insights, techniques, and their applications with clients, are invaluable to achieve deep competency.

“Listening to the tapes (since taking the live training) has been wonderful. Everything makes so much more sense now, and it seems so much more connected and simple—not the struggle I once imagined. I'm going to start listening to them again! There are so many things that I want to incorporate into my way of thinking, my way of being. It's like being in class again—crying, laughing, working through “stuff.” I even had a series of dreams where you invited Milton Erickson to be a guest speaker! Wonderful! I would highly recommend that anyone taking your class buy the tapes, too.”

—C.D., CHT, Live training Graduate

Before or after 150 hours of on-site study, you can choose to do the Distance Learning Certification with the A/V materials to complete 150 hours of additional study to receive certification in recognition of 300 hrs. of training – therecommendedminimum (see Distance Learning Section, these inserts, pp. 6&7).

**3] Advanced Study:** Upon completion of the live training, graduates may obtain the A/V materials for the wholesale investment of **\$1010.00** (\$1210-\$200). They can utilize them for independent continuing education, and to do levels of advanced protocols to receive the 300, 450, 600 hour and higher levels certification.

**4] Incremental Certification & Continuing Education:** The training provides a base minimum certification of 150 hours. **Completion of the 300 hour program is strongly recommended.** Once the basic 150 hour certification has been completed, the course can serve to guide the structuring of personalized continuing education and certification in various increments. The student and instructor tailor a program to meet the student's needs. For example, increments from 50 to 150 hours can be selected to achieve certification for 200, 300, 450, 600 hours and higher.

Most professions legally require annual continuing education; hypnotherapists would do well to participate in continuing education even though not required by law. The National Guild of Hypnotists, for example, requires 15 credit hours of education/year to renew membership. To meet and exceed these requirements, the Institute offers seminars in NLP and Hypnotherapy, mentorship classes, and supervisory oversight to graduates and therapists.

**5] Healthcare Professionals' Mentorship Programs:** Individual and group program options are tailored to the needs of various kinds of healthcare professionals to competently explore the Mind/Body Connection and the transformative power of holistic Mind/Body communication.

## ***Comments from Our DISTANCE LEARNING Students***

"The biggest joy of all, Jack, is watching how all around me, the people I love and care for most are engaging and moving more and more into healing and growth. With some I have been directly working, with others I am just better, more in rapport, more naturally therapeutic. It is clearly a direct result of your course and the work it enabled me to do on myself."

**Lynne P., Transpersonal Clinical Hypnotherapist, Luxembourg, Europe**

"It seems like I can't find any boundaries to the application of this material in my work with other people to assist their healing, as well as my own personal & spiritual growth. I'm near bursting with enthusiasm and ideas around the medical practice as well as the bodywork I do and variations on group meditations for working with medical problems. All in all, a pretty good deal, Jack!

**Julie H., Physician [M.D.], Washington**

I have worked my way through the tapes yet again (5 times now for some of them) and I still find things that mean something more to me now than on earlier passes. As my learning advances, concepts that were vague before become meaningful, so the tapes still seem relevant. I'd consider buying a new batch if you did another group of them! I am definitely a fan of the spiritual approach. It is so much more powerful for people than merely clinical scripts. I have found it easy to work inside the person's spiritual model and help the client ignite that appreciation for their living, humanity and presence. People are stunned! It's so incredible to be part of it. Sometimes I get a lump in my throat because I see it is happening for them and I am so glad, and I have to talk around that tight throat.

**Marie Rhodes, RN, Washington**

"I received knowledge from the training manual and books, and understanding from listening to you on the tapes. Thank you."

**Tim B., Naturopathic Physician [N.D.], Georgia**

"A really valuable thing about the tapes is their process flow, and how it becomes apparent that everything is useful material. Also, your voice and presence have an energizing and healing effect. Hearing the conviction in your affirmations at this particular time in my life has helped me move through a lot of 'hallucinatory' fears."

**Lee H., Social Worker, Maryland**

"Course contents were excellent. My interest stayed high throughout. The format was very good - I never was taken to a place of not understanding because of incomplete foundation work. It was important to me that the course covered a broad scope of what it means to be human and approached the human condition not as a pathological state, as so many healing modalities do, but as a movement in on-going unfoldment of the purity lost along the way of life. I appreciate the love within which the course was prepared and offered."

**Billie Jo S., Hypnotherapist, Alaska**

"I recommend the tapes without reservation to both graduates and new students. Listening to the tapes has deepened my personal understanding of self as well as my knowledge of the techniques of hypnotherapy. The tapes offer an on-going opportunity to re-evaluate ourselves to awaken to the richness and power of who we are, and to share that richness with others."

**Christine M., CHT, Graduate of Live Training**

## DISTANCE LEARNING/INDEPENDENT STUDY CERTIFICATION TRAINING

### TRANSPERSONAL HYPNOTHERAPY/NLP©

"I have and will continue to wholeheartedly recommend Jack's course to colleagues, anyone in the helping and/or health professions, and to anyone who is interested in deep healing, growth, or personal transformation for self and/or others. This is work that can change the world – inner and outer!!"

**Julie Hurlocker, M.D., Diplomate American Board of Family Practice**

#### Tuition investment includes:

- 1) 364 page training text, **Finding True Magic**,
- 2) **80 CDs** recorded at live on-site trainings. Over 80 hours of instruction. Plus, **6 DVD's**(90 minutes each, 1/Phase).
- 3) Telephone Tutorials/Optional Written Correspondence: **6 one hour telephone interviews**, with Jack Elias, Institute Director and Trainer. One tutorial per Phase (cost of calls not included in tuition). The student may elect to do written correspondence because of prohibitive phone expense. (See [5] below)

The course curriculum is divided into 6 phases (see pages 10 -15). When you complete the course work for each phase, you will call Jack Elias and complete the one hour tutorial for that phase. Upon successful completion of the 6 phases you will receive a certificate acknowledging 150 hours of Hypnotherapy/NLP Distance Learning with the designation of **Transpersonal Clinical Hypnotherapist**.

"The course is *excellent*. It contains a degree of depth and substance I could never have imagined when I first read about it. The time I've spent on this work has truly been transformative, and I feel very confident in my resulting ability to assist others in the healing process. I can't say enough about this course and the quality of the teaching – I would recommend it to anyone who wants to change his/her own life and help others to do the same. Thank you!"

—D.H., CHT, Distance Learning Graduate

#### Course protocol and certification requirements:

- 1] THE TEXT, **Finding True Magic: Transpersonal Hypnosis and Hypnotherapy/NLP©**
  - a) Read the text, phase by phase, as you listen and watch the instruction for each phase.
  - b) At the end of Phase I is a written test that must be completed and sent in by the beginning of Phase IV. This is the only written test in the course.
  - c) Hypnosis and hypnotherapy practice exercises are required for each phase. They will be obvious from reading the manual and listening to the tapes. Basically, you will be expected to practice each scripted procedure presented at least once, and to send notes to the Institute documenting each practice session.
  - d) The scripts, phase by phase, present elements of a comprehensive package of hypnotherapy tools and approaches. They are sequenced in such a way that they build upon each other and interconnect. Therefore, phase by phase, each script gives the student more tools to work with and integrate.

e) Some Phase I induction procedures only take a few minutes. Except for these brief techniques, you can expect to take forty minutes to one hour for a practice session. By Phase V, you may want to do 90 minute sessions that afford you the possibility of exploring more of the options the scripts will present to you. In general, there will be 3 to 5 one hour practice sessions per Phase.

## 2] THE CDs

a) **The CDs are of live unedited classes.** They will serve as your core focus to move through the course. The course is very lively and interactive. Instructive material is presented in an orderly fashion, but demonstrations happen repeatedly and spontaneously as we process students "stuff" (that's a technical term) on the spot. **This means that, even from Phase I, you will be exposed to comprehensive therapeutic processing between the trainer and students.** Real work is happening here—it is very moving. **It is common for students to spontaneously clear significant obstacles and experience healing and transformations while studying with these materials.** They contain a wealth of information for your clinical study and for on-going personal exploration. Through repeated review as an instructional resource, they will deepen your competency: *Repetition is the mother of skill and mastery!* As a personal catalyst, they will trigger personal revelations and growth for years to come. The video demo tapes will enhance your ability to relate to the much richer and more detailed audiotape experience.

b) You must send in a *brief* outline of what each CD covers. This is to verify that you listened to them, but **the primary purpose is to create an index to the CDs for easy future reference.** For example, with a tape player with a counter, an outline might look like this:

CD 15: Tr. 1 – presentation of subpersonality model

TR 2 – Spontaneous demo w/ student (Wow! Return to this later. Ask in tutorial how he did that!)

TR 4 – discussion, question and answer, break for practice session

TR 5 – discussion of practice session (670-780 really good sharing re: overcoming blocks)

## 3] THE WRITTEN TEST

a) Send in the completed written test by the beginning of Phase IV. This can be an open book test, at your option. I have found that most students are afflicted with old performance standard fears that were conditioned into them in public school. **Please keep in mind that this test and the other requirements of the course are not intended to provide me with opportunities to judge you. They are intended to be devices and tasks that will help you focus on and assimilate the material in a useful way. The test is pass/fail - no grade.**

## 4] PRACTICE SESSIONS

a) You will need to find one or more willing practice "clients". In a live training, students break into pairs or threesomes and practice each scripted technique as client and therapist. During the time between training weekends, they are urged to practice as much as possible. You are required to document one practice session for each procedure, but you are encouraged to do several more. Additional practice is beneficial, and will generate more experiences and questions to share and discuss in the phone tutorials.

## 5] TELEPHONE TUTORIALS/OPTIONAL WRITTEN CORRESPONDENCE

a) At the end of each phase, you will call for a one hour consultation. Be prepared with your questions and feedback about the materials. The calls should not be regarded as a test situation. They are meant to serve your learning process. If phone costs are prohibitive, elect the correspondence option. I will spend a commensurate amount of time on written responses.

## 6] THE REQUIRED READING

- a) **Becoming Naturally Therapeutic**, Jacquelyn Small
- b) **Hypnosis for Change**, Hadley/Staudacher
- c) **Psychotherapy: Purpose, Process, and Practice**, Foundation for Inner Peace
- d) **Hypnotherapy**, Dave Elman
- e) **Core Transformations**, Connirae Andreas
- f) **My Voice Will Go With You**, Sidney Rosen
- g) **The Courage To Give**, Jackie Waldman

These books can be purchased by credit card at [www.FindingTrueMagic.com](http://www.FindingTrueMagic.com). Read these books by the completion of the course material. Brief critiques of (a)-(g) are required. Book choices and fees may vary. The cost of the required list of books totals \$145 with tax.

## **Should I Take the Course in Person or Take the DISTANCE LEARNING/INDEPENDENT STUDY Option?**

For some of you the answer to this question will be clear because of financial and/or logistical considerations. It is less demanding financially and logistically to do the Distance Learning Option at home at your own pace. Live participation gives you the enriching and powerful experience of "on the spot" group interaction and direct involvement. In a live training, you have opportunities to be a demonstration subject with the trainer, and you get an average of 30 practice hours in therapy sessions as client and therapist.

It is common for students to experience **major transformations** while taking this course. This is true with both our live training and Distance Learning Option.

"What a great investment I have made and what a wonderful gift you have to offer. As I have listened to the tapes I have laughed, cried, become angry and experienced every possible emotion. I have learned more in these past seven months than in my entire lifetime. Your no-nonsense heartfelt approach is wonderful. I am looking forward to (live training) to learn to apply these simple delicate techniques and skills more intently."

**L.D., Transpersonal Hypnotherapist**

### **If financial / logistical considerations aren't decisive factors, consider taking both:**

Both courses have their unique strengths and value. As explained on the "Options" page, live training students and graduates are urged to buy the A/V program for study even if they choose not to seek additional certification. The A/V program is an invaluable preparation for live training. With the audio/video program, you experience the techniques of the course repeatedly applied and discussed under many more conditions and with many more people and issues than you can get in one live training. They are a permanent reference library you can use again and again to thoroughly absorb and integrate these learnings. **And they powerfully stimulate your own personal growth!**

One of two important understandings regarding hypnosis, and learning in general, is that *repetition is crucial* to truly elaborate and integrate a learning as part of our being. **While this is an important factor in the live presentation, repetition is most powerfully afforded by the tapes.**

The other basic and crucial requirement for hypnotic learning, and learning in general, is *vivid emotional impact*. Live classes, as you might expect, have a special "on the spot" intensity. The tapes, recorded at live trainings, carry that intensity and spark it in a special powerful, *yet safe* way in the privacy of listening to them. Students *consistently* report this.

"No other author (that I have read or studied) in this field brings such passion and consciousness to the 'how to' of hypnotherapy as Jack Elias. When I first started with (the book) I was pushed back a little by his "process" and then shortly realized that he was literally attempting to move me to an altered state while writing of his purposes and concepts. I could feel the compression of wisdom and mind wrenching and concept blowing sentences that brought whole realms of my own belief systems to the fore to be examined in an instant. Often, I would have to read and reread whole paragraphs and then put the book down and breathe deeply as mini-realizations of the Truth of Elias's monologue seeped in. I found myself celebrating "eurekas" often. One of the best things about the tapes is getting to know you and feel the great sense of humor and then getting inspired to go back and read the book again!" **G.M., Gestalt Therapist, Hypnotherapist**

The course is comprehensive. By the end of their study, "live" and independent study students have a *facility* with therapeutic processes, and with the business requirements of setting up a practice. They have the confidence to begin. But so much information is provided in the course, that *mastery* of all the material is impossible to achieve by the end of the course. *It is not expected.* What is hoped for is that you will maintain an inquisitive, inspired "beginner's mind" to constantly go back to the material, contemplating it and integrating it more and more thoroughly.

***Repetition is the Mother of Skill and Mastery!***

An interviewer once asked Milton Erickson, the foremost and most innovative hypnotherapist of this century, how he would sum up or define hypnosis after his 50+ years of study, contemplation and client work. Milton replied, "*It's too early to tell.*" *This is beginner's mind.*

**It is *highly recommended* that students do a live training *and* complete the Distance Learning Course protocols to qualify for 300 hour *and* higher Certification.** [Distance Learning protocols for live training graduates are more demanding than those described above for first time students.

### C) Non-Certification Tuition & Study Options

These options omit tutorials and submission of homework. They are for *acquisition* of the training manual and tapes only:

In general, non-certification options would be suitable in two cases:

1) Students satisfied with their existing credentials and with such confidence in their facility with therapeutic processes, that they think the dialogue with and feedback from the instructor unnecessary for their successful assimilation and utilization of the material, and

2) Students taking the course to develop the skills of self-inquiry and contemplation for personal growth who know they are motivated to thoroughly review the material without outside support.

**If one chooses this option, there is no certification or acknowledgment of completion of the course given. *This option can be converted to a certification program by submitting the required documents and taking the tutorials for each phase at an additional investment of \$200.00/Phase.***
